Alliance for Permanent Access

ESA, ESF, CCLRC, JISC, STM Publishers, BL, KB, NAS, DPC, Nestor, PIN, NCDD

European framework for a sustainable virtual infrastructure for permanent access to scientific information

Each scientific community will have a different repository infrastructure, but agree on standards to be interoperable

Each repository infrastructure will benefit from a number of common facilities (R&D, preservation tools, accreditation body)

Alliance for Permanent Access

Engagement with the different scientific communities:

- identify what to preserve and how
- identify key repositories
- establishing metadata schemes
- organising test beds
- identify commonalities
