## Our digital memory accessible tomorrow

The Digital Preservation Coalition (DPC) is a not-for profit membership organisation whose primary objective is to raise awareness of the importance of the preservation of digital material and the attendant strategic, cultural and technological issues. It acts as an enabling and agenda-setting body within the digital preservation world and works to meet this objective through a number of high level goals. Its vision is to make our digital memory accessible tomorrow.

**Algemene Rekenkamer evalueert informatiehuishouding van het Rijk**  
22-02-2010  
De Algemene Rekenkamer heeft onderzocht hoe het anno 2009 gesteld is met de duurzaamheid van de informatiehuishouding van het Rijk en heeft daarvoor onder meer informatie ingewonnen bij de NCDD. Het rapport is getiteld 'Informatiehuishouding van het Rijk: Overzicht van een dynamisch vraagstuk, een achtergrondstudie' en kan gedownload worden van <http://www.rekenkamer.nl/dsresource?objectid=87189&type=org>.  
Het rapport signaleert dat het in theorie niet zo ingewikkeld is om de informatiehuishouding goed te regelen. 'Er is echter in de loop der jaren een grote afstand ontstaan tussen het bedrijfsproces en het archiefproces.'  
[Lees verder](#)

**DEN publiceert rapport over born-digital erfgoed**  
10-02-2010  
Op verzoek van DEN onderzocht Maurits van der Graaf (Pleiade) hoe de Nederlandse erfgoedsector omgaat met born-digital erfgoed: digitale foto's, websites, e.d. Eén van de alarmerende conclusies van het rapport is dat interessant erfgoedmateriaal verloren dreigt te gaan omdat de acquisitie en verwerking ervan niet aansluit bij de traditionele praktijk. Het rapport is nu te lezen via de website van DEN, <http://www.den.nl/nieuws/20100208093853>.

# ICADS und Digital Preservation

The screenshot shows a Microsoft Internet Explorer browser window. The title bar reads "PADI - ICADS Topic: Digital Preservation - Microsoft Internet Explorer". The address bar shows the URL "http://www.nla.gov.au/padi/topics/734.html". The page content includes the PADI logo and the text "Preserving Access to Digital Information". The main heading is "ICADS Topic: Digital Preservation". Below this is the "icads" logo and the theme "Managing digital collections". The page provides information about initiatives and projects relating to Digital Preservation at national libraries contributing to ICADS. A list of "What's in scope?" includes: Preservation policy development, Risk assessment and appraisal of digital collections, Development of workflows and preservation services, Assessment and evaluation of technical options (e.g. migration, emulation), Preservation planning, and Preservation metadata schema, metadata generation and development. The page also mentions "For additional resources" and "ICADS libraries contributing to the topic:".

1950

- **US Federal Records Act** of 1950 expands the definition of a record to include "machine-readable materials."

1958

- Advanced Research Projects Agency (**ARPA**) is created by US Department of Defense to ensure military leadership in science and technology.

1962

- Inter-university Consortium for Political and Social Research (**ICPSR**) at the University of Michigan is established as a data archive.

1968

- US libraries begin using MACHine Readable Cataloging (**MARC**) records. [500 General Note](#)

1971

- Ohio College Library Center (**OCLC**) introduces an online shared cataloging system for libraries.

- **Project Gutenberg** begins to text encode public domain written works in the hope that they will be freely reproduced and distributed.

1972

- The US **Technology Assessment Act** is passed to "aid in the identification and consideration of existing and probable impacts of technological application."

1982

- The National Information Systems Task Force (NISTF) develops the first two formally recognized **archival description standards** in the US: NISTF Data Elements Dictionary and USMARC AMC.

1990

- Coalition for Networked Information (**CNI**) founded.
