# EASY

The screenshot shows the EASY website interface. At the top, the word "EASY" is displayed in large blue letters over a background image of a pair of pliers. Below this is a green header bar with the text "Welcome to EASY". The main content area is light green and contains three paragraphs of text. The first paragraph introduces EASY as a service for thousands of datasets. The second paragraph describes the on-line analysis tool and download permissions. The third paragraph explains the data deposit process. Below the text are two columns: "Search" and "Deposit". The "Search" column includes a search input field, a "Search" button with a magnifying glass icon, a "More options" dropdown, and a list of disciplines with checked checkboxes. The "Deposit" column features a "Deposit dataset!" button with a circular icon.

## Welcome to EASY

EASY provides access to thousands of datasets in the collection of Data Archiving and Networked Services – DANS.

Data- and documentationfiles are available for downloading free of charge. For some social science datasets it is also possible to use the EASY on-line analysis tool. In a number of cases, permission from the depositor is required before the data can be downloaded. In addition, EASY contains direct links to data available via other data repositories, in the Netherlands as well as abroad.

EASY can also be used to deposit research data. The data will be stored in a permanent and sustainable manner, according to the guidelines of the international Data Seal of Approval. The data are made available to other researchers under specific conditions in accord with the depositor.
